

Do you really know what research is conducted by faculty at USciences?

Is your research of interest to faculty in other departments?

Might you be interested in collaborating with other faculty at USci?

Here's a golden opportunity to meet and get to know the faculty at USci in a **very informal** setting. Introduce yourself, briefly discuss your research interest and current research and make new contacts (remember your business cards!!)

C.O.R.E.

Communications On Increasing Research Efforts Initiative

All faculty and graduate students are invited to attend, boxed lunches will be provided!

For more information or to **RSVP** contact

DSPR: k.logan@uscience.edu OR Faculty Liaison: Carl Walasek: c.walase@uscience.edu

Tuesday, October 4, 2011

Noon - 1:00pm

Wilson 205-208

Prizes & Giveaways

****** a chance to win \$200******

The aim of the CORE is to:

- Provide a mechanism for communication and collaboration between faculty and students with similar or overlapping interests
- Identify research strengths and interests among faculty
- Promote and expand ongoing research efforts and programs at USciences
- Identify suitable funding sources for faculty based upon specific research areas, interests, and expertise
- Foster faculty development and mentorship, particularly for junior faculty
- Support faculty in development of pilot or preliminary data for future grant submissions
- Foster development of future USciences leaders

It's our hope CORE sessions will launch a climate of collaboration among USci schools, faculty and the University City community.
